

**V-HARR® Premium Polishing Pads** are one of Superabrasive's most versatile and successful products. Originally designed for polishing and restoring concrete, V-HARR® is also ideal for terrazzo and hard stone floors, and can be used under any planetary floor polisher. The high quality felt works between the resin segments to clean the floor as well. We offer V-HARR® in a wide variety of sizes to accommodate many applications. If you require a size that is not listed below, please contact us for a complete list of diameters. Dry use is strongly recommended; however, V-HARR® will produce remarkable gloss results on black granite when used wet.

V-HARR® is also an excellent solution for concrete floor maintenance.

V-HARR® is the final step in the LAVINA SPS System, and is a critical component in the process of creating a high sheen on polished concrete floors. In addition to polishing and cleaning, the BUFF 8500 grit pad is used to seal and set LAVINA SPS GLOW. V-HARR® is a necessary tool for anyone polishing concrete.
