- ▶ *Joint Correction*
- ▶ *Improve Floor Flatness*
- ▶ *Create Non Skid Surfaces*
- ▶ *Aggregate Exposure*
- ▶ *Prep Surfaces*
- ▶ *Correct Poorly Placed
Concrete Slabs*

*....and more,
Contact Draygon To Learn
How The Draygon Shave King[™]
Can Help With Your Jobs*

The *Draygon Shave King*[™] uses the same concrete shaving technology and techniques highway contractors use to cut drainage grooves in highways—the only difference is they use “ganged” saws and larger equipment

A convenient screw mechanism adjusts cutting depth from .125” to .4” (maximum cutting depth .4” in a single pass)

Productivity = Profits

The versatile *Draygon Shave King*[™] with its Hydro-Static power drive technology with forward and reverse drive can shave surfaces up to 1,000 sq. ft. per hour ! (assumes 14” width and 1/8” deep cut in normal to hard concrete)

Compare that to an average of 300 sq. ft. per hour using alternate technology like shot blasting

Reliability = Low Operating Costs

Cutting path from 4” to 14” through the use of adjustable spacers
Cutting blades can last 40,000-50,000 sq. ft. in normal to hard concrete

Tooling operating costs under \$.07 per square foot

Draygon Shave King™ Specifications

Highly Productive Exceptionally Versatile Incredibly Reliable Amazingly Easy To Use

Up to 1000 Sq. Ft./Hour

Self-Propelled, Hydrostatic Drive

Forward and Reverse Drive

Sealed Bearings

Tooth Drive Belt

Micro Depth Control

Quick Lift Off Lever

Differential Axle For Close Turns

Removal Width Up to 14"

Cutting Disc 10" Diameter

Side Access Drum Assembly

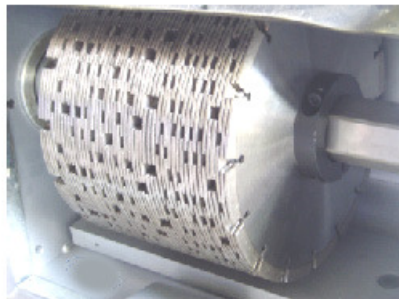

***Power - Electric
460 Volts, 15 HP***

***Dimensions
46x24x43 Inches
(LWH)***

Weight -895 Lbs

Power Cord -18 Feet

Vacuum Port

Options

***HEPA Vacuums
For Dust Containment***

***Replacement Blades,
Spacers***
