

**Dragon 10 Eradicator
Performance,
Reliability, Versatility**

The Dragon 10 grows as your needs grow. It simply removes faster with superior precision

A hex drive side-access drum assembly, together with adjustable depth cut, up to 10" cutting width and adjustable handlebar help you remove faster with better surface finishes.

The Dragon 10 is a four wheel design eradicator, preferred by professionals who must rely on one versatile remover to get the job done right the first time.

More consistent finishes since 4 wheels follow the substrate contours

The Dragon 10 Eradicating Machine

Specifications

Removal Width

Up to 10" (optional edgers up to 4")

Dimensions

44x19x39" (LWH)

Weight

240 lbs

Engine

Honda 13 HP gas engine with cyclone air cleaner, oil alert and tach/hour meter with alarm timer

Working speed

Dragon 10—2700 Linear Feet/Hour
EZOFF—5280 Linear Feet/Hour

Cutter Life

40,000 Square Feet (tungsten carbide cutters)

Centered Weight Over Cutting Heads
To Eliminate Bounce And Reduce Operator Fatigue

Automatic Greaser,
Adjustable Handlebar,
Patent Pending Brake System

Options

Vacuum

Dust Containment

Cutters
